Jun Ming Soh

Reliability Engineer, AMD | Machine-Learning and Data Analytics
Singapore, Singapore

Summary

I am a technology-driven individual with mechanical education background. Along my career progression, I am also venturing into software, machine learning and data analysis with the expansion of roles and responsibilities as a technical leader. My main interest always lies in technology research and development (R&D) and hope to deliver meaningful impacts and changes in our lives. Throughout my professional experience, I have been in charge of new test/tools/product startup development (both software and hardware), technical risk analysis with systematic approach, strategic/resource planning and execution with data-driven decisions, data analysis and management. As an active learner in Artificial Intelligence field, I am also pursuing more knowledge at my own time and certified for Machine Learning/ Deep Learning/ Data Engineering/ Advanced Tensorflow Technique specialization course.

Experience

AMD

Reliability Engineer

May 2022 - Present (4 years 1 month)

Singapore

- Multiphysics FEA simulation (mechanical, electrical, thermal, fluids) with ANSYS
- Component, package, board and system-level reliability study and analysis (warpage, solder joint, bending, crack, delamination, moisture, shock and vibration, joule-heating, electromigration)
- Reliability test DOE design, planning, execution and analysis
- Statistical analysis (lifetime distribution, best-fit, variability, space design filling, ...) using JMP, Python
- Field Life mission profile data management and analysis for product reliability lifetime risk analysis
- Material Characterization (DIC, DMA, TMA)
- Liaise with vendor for custom reliability test equipment design and fabrication

Intel Corporation

Graduate Mechanical Engineer

April 2021 - April 2022 (1 year 1 month)

Kulim, Kedah, Malaysia

- Coupled thermal-structure-fluids simulation with ANSYS LS-Dyna for solder reflow study. (Exceptional award recognition)
- Coupled thermal-structure simulation with Abaqus for viscoelastic materials study
- AI model framework development with Matlab Statistics, ML and Deep-Learning toolbox
- Data management with Python
- Literature research (complex materials, defects, failure analysis, new tools and methods)

Shang Hai Red Restaurant

Waitperson

November 2019 - January 2020 (3 months)

Chadstone, Victoria, Australia

Shang Hai Red is a Chinese restaurant that serves Chinese cuisines and delicacy in Chadstone shopping centre.

- Satisfied customers' requirements by helping them to order and serve food and noting down special dietary requirement if required.
- Ensured the high quality of hygiene condition in the restaurant by cleaning tables and floors.
- Commended for working effectively and handling all the orders and servings systemically especially during high peak hour, which demonstrated my ability to work in a fast-paced environment.
- Provided training and guidance to fresh colleagues to bring them up to the working pace.

Monash University Malaysian Student's Union (MUMSU)

Editorial Officer

October 2018 - October 2019 (1 year 1 month)

Melbourne, Australia

Monash University Malaysian Student Union (MUMSU) is a not-for-profit organization club which represents all Malaysian students within Clayton, protect their rights and interests within Australia and strengthen the unity amongst all Malaysian students, but to also share the rich Malaysian culture and tradition embedded within us with the community around us. Formed in 1972, it prides itself as one of the most successful clubs running in the

university with connections streaming all across different companies and universities throughout Victoria.

Every week during the study semester in university, MUMSU will organize at least one event which gathers the members to enjoy, connect, have fun and also to help them gain more insights about the unique of Malaysia diverse culture. As an editor committee in MUMSU, capturing the photographs for every moment of the events is our responsibility as well as editing the photos and adding MUMSU logo watermark using photo-editing software such as Adobe Lightroom every time after the event. Other than that, we also make videos for some events and promotional videos for the sponsors of our club using video-editing software such as Adobe Premiere Pro.

Daikin Malaysia Sdn Bhd
R&D Engineering Intern
November 2018 - February 2019 (4 months)
Selangor, Malaysia

Daikin Refrigeration Malaysia- Shah Alam is an HVAC company that focuses on the manufacturing and development of chiller and Air Handling Unit (AHU) products. During my time in DAIKIN, I :

- Researched on the working principle of company products, especially water-cooled and air-cooled chiller and the company's production line and coordinated with colleagues to bring in the key learnings to the team.
- Brought in new measurement devices to the company. Started from understanding the required specifications of the devices, approach the vendor and arrange meetings for demonstration, prepare purchase recommendation letter, decision-making with internal team and all the way to the final purchase.
- Did engineering change note on company's product. Read and compare engineering drawings between old and new components and state out any possible misconfiguration.
- Assisted in the assembling of a mock-up product/prototype and ensured the safe working environment by ensuring SOP is being followed.

Bosch STEM Tinkering Workshops
Facilitator
July 2018 - October 2018 (4 months)
Melbourne, Australia

Bosch STEM tinkering workshop aims to inspire young middle-school students into the pathway of the STEM by providing them opportunities to engage with

robot building projects. In the workshop, students are taught and instructed wisely by industry professionals at Bosch.

The main role of being a facilitator is to inspire the students by helping them to gain interest in the STEM and explore their own potential in it. While students are learning and building robots in the workshop, the facilitator joins them and assists the students by their side. If students encounter difficulties and obstacles working on the project, the facilitator helps them to do the troubleshooting and gives hints or instructions to solve the problems. Not just for students, the facilitator also plays an important role in providing useful feedback and advice about this program to director in order to improve the quality of the workshop and let more students willing to join it and get inspired. Last but not least, facilitators are required to ensure students enjoy and have most of the fun in it while learning all the knowledge and skills in the workshop.

Education

Monash University

Bachelor's degree, Mechanical Engineering · (July 2016 - August 2020)
